

Ing. IHOR MIRZOV, PhD

Research engineer (nuclear and automotive industries).

Always seeking the most elegant solution.

Smart, intelligent, strict, punctual, accurate.

Ukrainian, age 41, IQ 124, speak 4 languages, [ISTJ](#).

+420 606 471 603, ihor@mirzov.cz

MAIN SKILLS

R&D, complex problem solving.

Python, wide programming experience since 1992.

Abaqus: non-linear FEA with Fortran subroutines.

EDUCATION

2008–2016: PhD "Stress-strain state of the VVER-1000 RPV internals"

2002–2008: [Moscow Institute of Physics and Technology](#)

EMPLOYMENT

2020–Now: Programmer at [Škoda Design](#) (externist from IDIADA)

- Software development, light orchestration, Raspberry/Arduino, MicroPython/Embedded C, Autodesk VRED, Blender, VR etc.
- The whole Škoda Design department relies on my tools and scripts.

2019–Now: CAE Project Engineer at [Applus IDIADA](#)

- Python scripting, research projects and FE analyses for automotive industry.

2016–2019: R&D specialist at [UJV Řež a.s.](#)

- Non-linear SIMULIA Abaqus models with Fortran user subroutines, stress-strain state with radiation creep and swelling, thermal transients, strength assessment.
- Supported Czech and Ukrainian nuclear power plants.
- Python scripting, data processing, FE models pre- and post-processing.

2007–2016: Research specialist at [Paton Electric Welding Institute](#)

- Matlab/Octave scripting for scientific spatial data processing.
- Welding simulation, strength assessment of operating Ukrainian NPP components.
- Static strength, fatigue, thermal shock.
